MESSAGE FROM THE DIRECTOR

Montana's grain transportation network has changed considerably over the past eight years. In 1976, before the 52-car unit-train rail rates came into existence, only 50 percent of Montana grain was moved by rail. Today over 90 percent of our grain is moved out of Montana by this mode of transportation. The 1984 Montana Grain Traffic Statistics publication verifies this percentage and shows the extent of control the rail transportation system holds over the state's grain industry.

These statistics indicate how grain markets have changed over the years, providing a good history of Montana grain-marketing patterns. These marketing and transportation changes are important to the grain growers who are affected by the economic impact of these changing markets and transportation rates.

This summary differs from those of the past. The grain-movement statistics in this publication have been derived using an expansion factor. These statistics provide a basis for a more realistic analysis of inter- and intrastate grain-traffic movement.

I am pleased to present this year's grain-movement summary. This publication is and will continue to be a vital source of statistical information useful in our effort to build a healthy economy for Montana's number one industry -- agriculture.

Sincerely,

Keith Kelly
